

## Control Pad 683 PS/2 & USB

(SKU#683)

### Product Highlights

**Description:** Now shipping with 3 Double Keys and a Keycap Puller.

The Controlpad 683 is versatile, 24-key programmable keypad. The keys are relegendable, allowing the user to label them to fit a specific need. The non-volatile built-in ROM allows the keypad to connect to most IBM compatible PCs without installing resident software. The keypad is easy to program using the Windows compatible software provided. Assembled with high quality Cherry keyswitches, the keys are durable, yet light and easy to press--a feature lacking on lesser quality keypads. The PS2 "Y"/wedge adapter allows this keypad to share either a keyboard or mouse PS2 port.
