

Custom Cards

We'll help you select the right software and printer or we'll preprint your cards and badges for you. Utilizing materials specifically chosen to yield the highest quality product, all plastic cards shipped meet or exceed the very stringent guidelines set forth in ISO 7810 - 7816. Our specifications for proximity cards offer up to Seos™. This level of quality is critical for cards that must enter some type of peripheral, we'll help you select the right ID card printer, card reader and writer, barcode or mag stripe reader, presence detectors and converters.

Ask us how we can optimize your card identification project with your custom printed message.
